Centers for Medicare & Medicaid Services
The Hubert H. Humphrey Building
200 Independence Ave., S.W.
Washington, DC 20001

Dear Centers for Medicare & Medicaid Services (CMS):

We are nearly 20,000 Americans brought together by the Health Equity Coalition for Chronic Disease, representing a vast grassroots community from across the country advocating for policies that will help combat the worsening obesity epidemic. As such, we strongly urge the Centers for Medicare and Medicaid Services (CMS) to finalize the proposed rule that expands Medicare and Medicaid coverage to include FDA-approved anti-obesity medications for people living with obesity.

This is a critical opportunity to help millions of Americans access effective treatments for the chronic disease of obesity. Expanding access to these medications can significantly improve the health outcomes of millions of Americans, reducing the risk of associated conditions like heart disease, stroke, type 2 diabetes, and certain cancers.

Bipartisan lawmakers and advocacy leaders — representing tens of millions of Americans from all 50 states — have praised the proposed rule as a major step toward improving the health of millions of Americans and finally combating a costly epidemic that takes a \$173 billion toll on the U.S. health care system every year. We know personally that this rule will make a difference in the lives of Americans living with obesity.

By finalizing this policy, CMS has an era-defining opportunity to potentially reverse decades of deteriorating public health and rising obesity rates experienced by millions of Americans — in communities both rural and urban, big and small. This policy will usher in a new era of American public health while also cementing a commitment to ensuring that all Americans have access to evidence-based care and the opportunity to live longer and healthier lives. We urge the Administration to finalize the rule to expand coverage in Medicare and Medicaid to FDA-approved anti-obesity medications.

Sincerely,

Nearly 20,000 Americans Advocating for Improved Healthcare for All
